Personal Debt
A look at the lives of half a million people in debt in the UK

2016 STATISTICS YEAR BOOK
There was record demand for advice from StepChange Debt Charity in 2016. 599,026 people contacted us for help during the year, one person every 53 seconds.
Demand for debt advice

The highest demand in absolute terms came from London. 102,133 people from the capital sought debt assistance in 2016, the equivalent of 118 people per 10,000.

The highest level of demand compared to population came from the North East, where we advised 132 clients per 10,000.

In 2016 there were 3.3 million visits to the charity’s website, an increase of more than 100% over five years.

What debts do people have?

The average debt of our clients earning less than £30,000 increased by £569, to £12,897, in 2016. Over the same period, the average debt of clients earning more than £30,000 decreased by £2,160 to £29,340. Because those earning less make up a far higher proportion of our client base, this means that for the first time in eight years the overall average unsecured debt of our clients increased, from £13,900 to £14,251.

On average clients have 5.7 unsecured debts, including almost three credit cards. Overall, more than two-thirds of clients owe money on credit cards and over half have overdraft debts.

The amount of debt owed on catalogues, personal loans, store cards, home credit and payday loans increased between 2015 and 2016.

In addition to unsecured credit commitments, four in ten people are behind on their household bills. This is an increase of 5% over the last five years. On top of their unsecured debts, this amounts to an additional average debt burden of £2,061 for these clients.

Debt owed by clients to their family and friends continues to grow rapidly. Last year, 28.3% of clients owed money to a relative or friend. In total they owed almost £434 million. This is £135 million more than they owed in 2015.
Who’s seeking advice?

The proportion of clients aged under 40 continued to grow in 2016. They now account for 60% of all clients advised. Five years ago it was 52%. One in five clients is a single parent. This is double the proportion of single parents in the UK population.

The proportion of clients who rent their home has grown from 61% to 78% in just five years. The fastest growth in demand has come from those living in private rented accommodation who now account for almost four in ten clients.

Family wage income continues to stagnate. Average client household take home pay not including benefits income in 2016 was £46 less per month than it was five years ago.

Wage stagnation means the number of clients unable to cover essential outgoings has continued to rise. Even after a budgeting session, 29% of clients in 2016 did not have enough to cover all essential bills at the end of the month.

Although higher earners have higher debts, the vast majority of StepChange Debt Charity clients are in lower-income groups. Last year, 70.2% of clients had an income of less than £20,000 (net) per year. As the chart above shows, these lower income groups are the ones who saw their average debts increase in 2016.

Debt to family and friends

The proportion of clients owing debts to family and friends has increased significantly over the past three years, as has the average debt owed. This means that the total amount owed by clients to family and friends in 2016 was almost £434 million, almost £200 million more than was owed in 2014.
Arrears on essential household bills

Average arrears on each bill:

- TV licence: £78
- Gas: £553
- Magistrates’ fines: £696
- Electricity: £677
- Water: £722
- Hire purchase products: £897
- Council tax: £991
- Rent: £970
- CCJ: £2,489
- Mortgage: £3,389
