## Introduction

Debt is pervasive in modern Britain. At the beginning of 2013, the total value of all loans in the UK excluding student loans - stood at $£ 1.4$ trillion, or almost $£ 30,000$ for every adult.

89 percent of these trillions is mortgage debt. The remainder - around $£ 158$ billion - is consumer debt. About a third of this - $£ 53$ billion - is credit card debt.

StepChange Debt Charity has $£ 3.8$ billion in unsecured debts under its management, and helped over 129,000 people repay $£ 327$ million in 2012. £13.3 million came from Scotland.

However debt can become a problem at just $£ 10$, particularly for those on low incomes, and this report is about them. It looks at extensive data provided by StepChange clients in Scotland - 4,557 in 2012 - and allocates each according to postcode into one of the 73 Scottish Parliament constituencies. It also compares debts in Scotland with trends in the other home nations and the eight Scottish Parliament electoral regions.

We present this data to give a general indication of the debt problems across Scotland and where demand for StepChange services came from between 2009-2013. Due to the low number of clients in some Scottish constituencies, data in these tables should not be viewed as statistically representative.

StepChange Debt Charity Scotland advised 4,694 Scots by the end August 2013, an increase of 46 percent on the same point last year.

## Key findings

1. The average debt of a StepChange client in Scotland fell to $£ 13,939$ by June 2013. This was the lowest in the UK, which had an average client debt of $£ 15,047$.
2. The average net income of a StepChange client in Scotland increased slightly to $£ 14,532$ by June 2013. Average net incomes fell in every other nation over the same period, with a UK average of £14,457.
3. In 2012 clients in Scotland had almost twice the UK average value in Council Tax arrears, at $£ 1,312$.
4. Over 10 percent of client debt in Scotland last year was due to payday loans - the largest share among the home nations.
5. StepChange has seen a significant increase in the number of clients with arrears in priority debts including rent, mortgage, gas, electricity and Council Tax.

## 1 Home nation debts

Average unsecured debt has been falling steadily in the UK for the last five years, reflecting both the decline in mainstream consumer credit since the recession and a more responsible approach to lending and borrowing.

Considerable challenges remain however, not least that many Britons still owe more in unsecured debts than they can earn in a year. In 2012, the average net income of a StepChange client in the UK was just $£ 14,707$, while the average debt was $£ 16,557$.

Rising prices plus static wages equal declining incomes, meaning many of these households are treading water just to stand still. The Joseph Rowntree Foundation suggests a 'minimum income standard' in 2013 of $£ 16,850$ net for a single person, or $£ 19,400$ each for a working couple with two children.

It also estimates that food costs have risen 24 percent in the last five years, rent in social housing by 26 percent and energy costs by 39 percent. Such dramatic inflation puts a heavy weight on those already struggling to balance a delicate budget, something evidenced by the data in this report.

As the table below illustrates, the average debt of StepChange clients across the UK fell to $£ 15,047$ in the first six months of this year. Clients in Scotland had the lowest average debt of $£ 13,939$.

Incomes have fallen in each country except Scotland, which by June 2013 had an average client net income of $£ 14,532$, slightly above the UK client average of £14,457.

There has been a significant rise in priority debt arrears at the same time, with rent, mortgage, gas, electricity and Council Tax arrears all showing a marked increase.

StepChange clients in Scotland had the second lowest average income among the home nations in 2012, but also the lowest average debt. In fact it was the only nation with a larger average income than debt, at $£ 14,280$ and $£ 14,149$ respectively, and this gap has widened in the first six months of this year.

In 2012 Northern Ireland had both the highest income and highest debt of StepChange clients in the UK. Wales had the lowest income in 2012, and this trend continued by June 2013.

Clients in Scotland had the greatest Council Tax arrears in 2012 - at $£ 1,312$, nearly double the UK average. Scots were also amongst the highest in number for Council Tax arrears, and this trend continued in the first six months of 2013, where over a third of clients in Scotland had arrears.

However Scotland had the lowest percentage of clients with mortgage arrears in 2012, together with their lowest average value, at 35 percent and £2,328 respectively, or three percent and $£ 634$ below the UK average.

England was predominant in the home nations for problem debt in 2012, perhaps reflecting its larger share of the charity's client base. It ranked top in both value and numbers for rent arrears, top in the value of mortgage arrears, and top for numbers with gas arrears and electricity arrears.

Only Northern Ireland had a higher number of clients with mortgage arrears than England in 2012, perhaps reflecting its recent tumultuous housing market.
Clients in Scotland had the highest electricity arrears by value in 2012 .
Clients in Wales had the highest number and value of payday loan debts in 2012, although the spread in this type of lending has been consistent throughout the UK. Nearly 20 percent of StepChange clients had at least one payday loan by June this year, double the number from 2012, and up from just two or three percent in 2010.

### 1.1 Debt by volume

Clients in Scotland had the highest level of debt from overdrafts and personal loans between 2010 and 2012, at about 20 percent for each (See Annex 1). These had dropped to around 16 percent by June this year, although remain significant.
Over 10 percent of client debt in Scotland was the result of payday loans by June 2013 - the highest rate among the home nations. Across the UK, payday loan debt by value has grown from 0.9 percent in 2010 to 9.4 percent in June 2013. Over the same period credit card debt by value fell from 38.6 percent to 30.9 percent (See Annex 1).

Clients in Northern Ireland have consistently had the highest rate of credit card debt since 2010, at around 40 percent, while historically Wales has had the highest rate of catalogue debt (See Annex 1).

| \% gas arrears | $11.9 \%$ | $11.3 \%$ | $10.0 \%$ | $9.3 \%$ |
| Average gas arrears | $£ 455$ | $£ 447$ | $£ 389$ | $£ 391$ |
| \% Council Tax arrears | $35.3 \%$ | $29.0 \%$ | $22.1 \%$ | $18.7 \%$ |
| Average Council Tax arrears | $£ 1,317$ | $£ 1,313$ | $£ 989$ | $£ 1,131$ |
| \% payday loan | $18.2 \%$ | $9.0 \%$ | $5.9 \%$ | $2.6 \%$ |
| Average payday loan | $£ 1,452$ | $£ 1,398$ | $£ 1,070$ | $£ 904$ |

The average unsecured debt of a StepChange client in Scotland has dropped steadily in recent years. Average incomes have risen incrementally, perhaps reflecting a growing number of higher income clients approaching the charity.

There has been a significant increase in the percentage of clients with arrears in priority debts. Over a third of clients in Scotland had Council Tax arrears in June this year, almost double the number in 2010 and the highest rate in the UK.

40 percent of clients were in arrears with their mortgage in June 2013 - incredibly still the lowest
percentage in the UK - while just under a third were behind with their rent. The value of these arrears however has remained fairly level, and below the UK average. This suggests that more people have exhausted all other forms of credit to pay their housing costs before seeking help.

Energy arrears have shown a slight but steady increase, and now affect over one in 10 clients.

The most dramatic rise in client debts in Scotland has been in payday lending, with almost 20 percent of clients having at least one in June 2013 - a ten-fold increase since 2010.

## Average client incomes

### 2.1 Average incomes

The average Scottish client income in 2012 was $£ 14,280$ - or $£ 1,190$ each month - below the UK client average of $£ 14,707$, or $£ 1,226$ each month.

37 Scottish Parliament constituencies - just over half had average client incomes greater than this.

Glasgow Region has had the lowest average client income for two of the last three years. As the table above illustrates, it has remained fairly level at just over $£ 1,000$ per month since 2010.

## Constituencies with highest average income (2012)

| Strathkelvin and Bearsden | $£ 1,536$ |
| :--- | ---: |
| Midlothian South, Tweedale and Lauderdale | $£ 1,519$ |
| Aberdeenshire West | $£ 1,480$ |
| Renfrewshire South | $£ 1,472$ |
| Renfrewshire North and West | $£ 1,428$ |

Constituencies with lowest average income (2012)

| Glasgow Pollock | $£ 951$ |
| :--- | ---: |
| Dundee City West | $£ 965$ |
| Shetland Islands | $£ 996$ |
| Edinburgh Northern and Leith | $£ 1,025$ |
| Glasgow Kelvin | $£ 1,025$ |

### 2.2 Average debt levels

The average debt for StepChange clients in Scotland was $£ 14,149$ in 2012, below the UK average of £16,557.

32 Scottish Parliament constituencies were above the average Scottish client debt level in 2012.

Glasgow Region has consistently had the lowest average client debt in Scotland, falling to $£ 11,946$ in 2012. This perhaps reflects the traditional correlation between low income and low borrowing. The highest average debt is found with clients in the South Scotland Region, at $£ 15,537$ in 2012.

## Average client outstanding debt

### 2.3 Budget surplus and deficit

A budget surplus is the money left over at the end of the month after all expenditure - excluding debt servicing costs - has been accounted for. It is a key statistic in assessing the strength of a client's financial position.

In 2012 the average budget surplus in Scotland was £17.94. 30 constituencies had a surplus below this, of which 24 were deficit budgets i.e. clients in 24 constituencies did not have enough income to meet basic living costs.

Constituencies with largest surplus (2012)

| Dunfermline South | $£ 136$ |
| :--- | ---: |
| North East Fife | $£ 121$ |
| Galloway and West Dumfries | $£ 118$ |
| Moray | $£ 106$ |
| Orkney Islands | $£ 82$ |

| Constituencies with largest deficit (2012) |  |
| :--- | ---: |
| Edinburgh Southern | $-£ 136$ |
| Stirling | $-£ 134$ |
| Greenock and Inverclyde | $-£ 101$ |
| Eastwood | $-£ 83$ |
| Edinburgh Western | $-£ 6$ |

$\qquad$

## 

$\qquad$

[^0]
## 3 Housing-related debt

Household bills such as rent, mortgage and utilities are classed as priority because the consequences of not paying them are significant, such as homelessness. Nevertheless, StepChange Debt Charity frequently finds clients prioritising other debts such as payday loans, due to misplaced fear and anxiety.

### 3.1 Rent arrears

The average value of rent arrears among clients in Scotland has been declining steadily, reaching $£ 581$ in 2012, suggesting that clients are receiving help sooner. However the spread of arrears has grown, particularly over the last six months. In June 2013 almost a third of clients had rent arrears, an increase of over 10 percent in the last three years. This indicates more than just pressure from low wage inflation, but also the impact of benefit changes under welfare reform.

Over a third of clients in Glasgow Region had rent arrears in 2012, making it the highest at more than 10 percent above the Scotland average. Glasgow has remained near the top for rent arrears since 2010, although was overtaken by Mid Scotland and Fife in the first six months of 2013.

South Scotland Region had the lowest average number of clients with rent arrears in 2012, yet was highest in the value of arrears. West Scotland Region had the highest value of rent arrears in both 2010 and 2011, but this position was taken by Lothian Region in the first six months of 2013.

26 Scottish Parliament constituencies were above the £551 Scottish average value of rent, with Clydesdale over six times that.

Percentage of clients with rent arrears

## Average rent arrears

Average mortgage arrears

### 3.2 Mortgage arrears

Mortgages are by far the largest priority debt among StepChange clients in Scotland, with over a third in arrears in 2012, rising to over four in 10 by June this year. The charity is seeing more clients in Scotland with mortgage arrears although the average value of arrears has remained fairly level.

Scots owed $£ 2,328$ on average in mortgage arrears in 2012. This figure has see-sawed around that number in previous years, and there is considerable variation between constituencies.

Percentage of clients with mortgage arrears

Lothian Region has traditionally shown the highest number and value of mortgage arrears, at almost 40 percent and $£ 3,000$ respectively in 2012 . However North East Scotland has shown a big increase in the first six months of 2013 in the number of clients with mortgage arrears, while West Scotland has seen a significant increase in the value of arrears. Lower levels of mortgage arrears are seen among clients from the Highlands and Islands Region.

38 Scottish Parliament constituencies were above the 35 percent Scottish average in mortgage arrears by number, while seven constituencies had one in two clients in arrears. Only six constituencies had less than one in five clients with mortgage arrears.

30 Scottish Parliament constituencies had a greater value of mortgage arrears than the Scottish average value of $£ 2,328$.

### 3.3 Council Tax arrears

Council Tax arrears among clients have increased considerably since 2010, both in value and numbers, with Scotland ranking first and second in the UK respectively. On average, 29 percent of Scottish clients had arrears in 2012, and this jumped to over 35 percent by June this year - more than double the number from 2010.

As the chart on page 16 illustrates, the rise in the number of clients with Council Tax arrears has been consistent across Scotland. Glasgow Region had the highest percentage in arrears by June 2013, although Mid Scotland and Fife and Lothian Regions also show notable increases.

Percentage of clients with Council Tax arrears

Glasgow Region does remain consistent in the value of arrears however.

## Average Council Tax arrears

## 4 Payday lending

There has been a dramatic rise in payday lending client debts in Scotland. Almost 20 percent of clients had at least one in June 2013 - a ten-fold increase since 2010.

In 2012 the average monthly income of a StepChange client in Scotland with payday loans was $£ 1,190$, but the average payday loan debt was $£ 1,400$, meaning monthly repayments could leave a client with no money for living expenses and push them further into debt.

Across the UK, over 65 percent of clients with a payday loan in 2012 had contractual payments worth more than 100 percent of their income. When compared to clients who did not have a payday loan,
only 14 percent had contractual payments worth more than 100 percent of their income.

StepChange Debt Charity has seen a massive rise in complaints about payday loans - increasing from four percent in 2010 to 30 percent in 2012. The problem is being felt by the under-25s particularly - in 2012 42 percent of our UK clients under the age of 25 had payday loan debts. In 2011, this was 25 percent and in 2010 only 10 percent.

34 Scottish Parliament constituencies had more than the Scottish average number of clients with payday loans in 2012, three of whom had more than double the average.

Percentage of clients with payday loan debt

## Percentage of clients with a payday loan

The average number of payday loans per Scottish client in 2012 was 2.9 - an increase from 2.2 in 2011 and 1.8 in 2010. This reached 3.0 in the first six months of this year.
